

Lock Seal

Flair's LiDynamics® lidding film program features a wide range of lock seal structures to meet your product, process & shelf-life specifications, and are designed for compatibility with PP, HDPE & PE-coated tray substrates.

Engineered with a wide operating window of 130-210°C, our lock seal films offer strong seals through grease & residue to protect the integrity, quality & food safety of products throughout your value chain. High-clarity structures with anti-fog options for refrigerated applications, our lock seal range provides superior protection & appeal for your products in the case and on the shelf.

Our products are FDA, USDA & CFIA compliant and are managed through our FSSC22000-certified food safety management system.

Options & Services

- Available in range of barriers & thicknesses for a variety of applications
